

Synthetic Data Simulation Results

2023-12-04

Simulation Summary

LTMLE generated quite a few errors, reducing results given available time. Below are counts of completed runs and runs with errors for each simulation setting.

data	estimator	learners	completed_1000	error_1000
MC	DGP	NA	0	1
MC	DGP	glm_true	31	0
MC	Marginal	MC	32	0
Synthetic	Marginal	glm_true	159	0

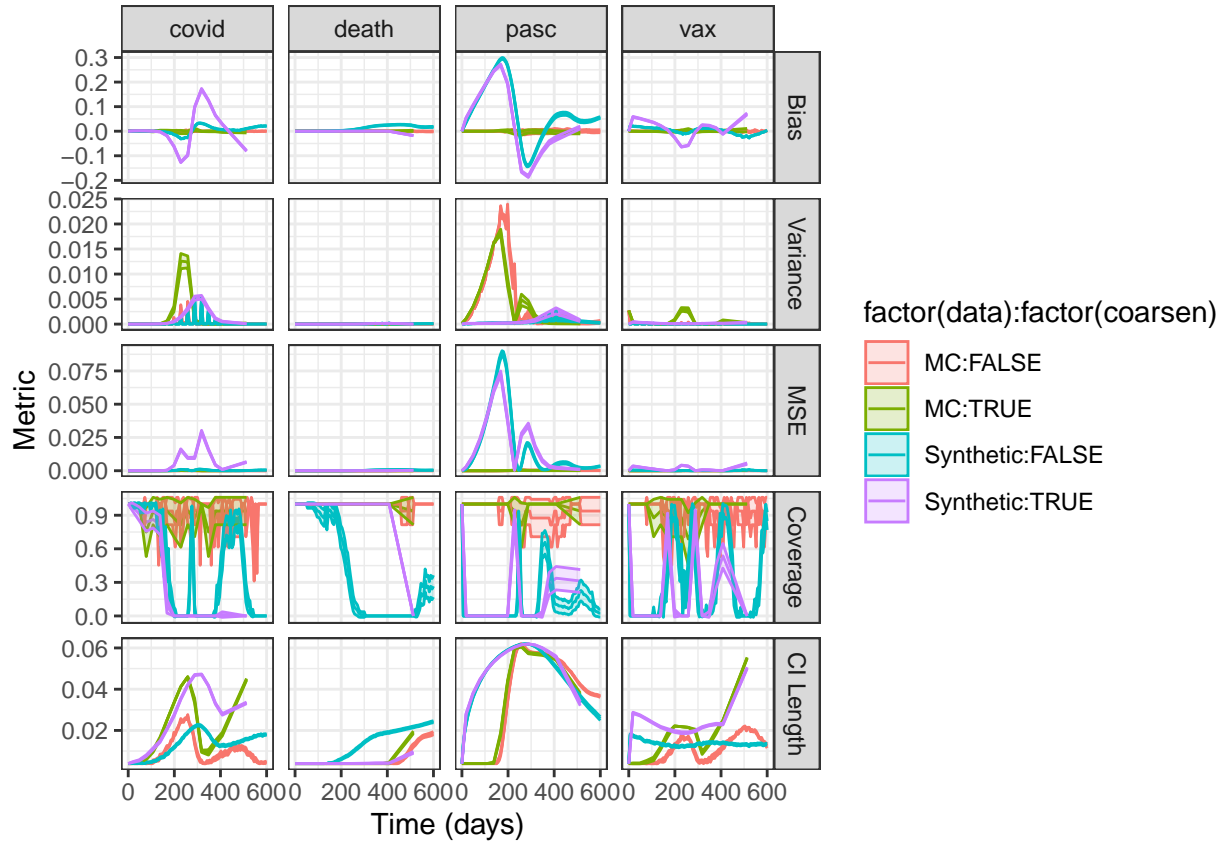

ignore the error counts here (they're for sims we don't expect)

data	estimator	learners	1000
MC	DGP	glm_true	00:00:42
MC	Marginal	MC	00:00:04
Synthetic	Marginal	glm_true	00:00:05

Point Estimate Performance

Point estimate performance was degraded, improving somewhat at larger sample sizes. This suggests a need for estimation with more data adaptive models.

$n = 1000$

Bias

n = 1000
